We have Poultry Crates for those shipping poultry.

5th FORTNIGHTLY CROP REPORT

Issued by Department of Agriculture,
Government of Alberta, Ed-
monton, July 10, 1926

Generally satisfactory conditions prevail throughout the province with respect to the growing crops. A period of great heat has occurred since last report, but the crops have been affected very little thereby. The weather generally is ideal for growth.

Early seeded grain in the south is in head, and short, but with more rain will produce a fair yield. There has been generous precipitation throughout the south with the exception of a few limited areas, and the prospects are encouraging. Late sown grain in the south is growing rapidly and showing a most satisfactory condition. In the central and northern parts, while there has not been any further heavy precipitation in general, the conditions are excellent. From twenty-five to fifty per cent. of the wheat in central districts is coming into the head.

Hail is reported from one or two localities, but the damage has been slight. The general consensus of opinion is that with normal conditions, the province will harvest above an average crop.

Irrigated crops in the south are in excellent shape. Alfalfa has been a very good crop for the first cutting, and the corn and sugar beets are coming along well.

Pasturage has been good and there is an increase in milk production.

DROWNING FATALITY IN LITTLE RED.

Harold Howard, a young man of twenty years of age, son of H. J. Howard, a farmer in Grand Prairie district, was drowned last Sunday in the Little Red Deer river, about half a mile north of Batuma schoolhouse. Young Howard, accompanied by two companions, Mitchell and Lyle Dunwoody, brothers, aged 14 and 12 years respectively, went to the river about 1 o'clock and went in swimming.

J. K. Johnson, who lives in the neighborhood, passed the place about 1.30 and the deceased urged him to come in swimming, but he refused as he had just had his midday meal, and left. He had only gone a short distance when he heard calls for help and running back, saw Howard making frantic struggles to swim ashore without success. Throwing off his outer clothes and boots, Johnson plunged in took hold of Howard, who grappled with him, and pulled him under. Breaking the clutch of the drowning lad, Johnson again took hold of him and endeavored to swim ashore. Grasped around the waist by Howard, Johnson released himself with difficulty and being then completely exhausted, he made the bank with his last remains of strength, alone.

Meantime Mitchell Dunwoody had run to the road about half a mile distant and told G. Glover, who was passing in a motor car, that a man was drowning in the river. The latter hastened to the place on foot, but Howard was dead when at last pulled from the river.

Dr. Lester Clark, of Didsbury, the coroner, after hearing the statements made by all the eye-witnesses to Constable J. Valk, of the A.P. Police, considered an inquest unnecessary, and the body was turned over to H. J. Howard, father of the deceased, for burial at Bottrel. The coroner recommended that a notice be placed at the spot where the drowning occurred, warning swimmers that it was dangerous owing to a whirlpool being at that spot in the river.

TWENTY-FIVE MEN REPORTED MISSING

Appalling Tragedy in Dover, N.J.;
Property Damage Estimated at
\$93,000,000.

War Time Inferno; Shells Thrown a
Mile; Scores of Civilians Injured.

DOVER, N.J., July 12.—Confusion was spread last night over a wide area of New Jersey's countryside where havoc had been wrought Saturday night and Sunday by the explosion of the Lake Denmark naval munition dump.

Out of the mass of rumor and conjecture surrounding the disaster these facts came:

Dead—Nine, three identified.

Missing—Twenty-five.

Injured—Several hundred.

Damage—\$93,000,000.

The naval depot was completely destroyed and the adjoining army ammunition dump at Picatinny damaged to the extent of \$5,000,000. Damage to civilian property could not be estimated, but it was thought probable that it would amount to \$1,000,000.

Doors and windows were blown in, plaster shaken down, roofs smashed and brickwork cracked in hundreds of homes in the villages near the arsenal. The mining village of Mount Hope was reported wiped out.

It was late last night when the death toll was increased from three to nine, as six bodies were sighted in the ruins of the naval arsenal.

Many Not Accounted For
Twenty marines, one soldier and between five and ten civilians are still unaccounted for. Their bodies may be among the 200 smashed and burned buildings of the depot in which big shells, T.N.T. depth bombs and cases of powder are still exploding.

RED ROSE

"is good COFFEE"

Canada's Year Of Jubilee

The Dominion of Canada has entered upon its diamond jubilee year and on July first next year Canadians will celebrate in a fitting manner the sixtieth anniversary of Confederation.

It will be most timely and in every way appropriate if in the months intervening before that historic date all Canadian organizations make it the chief item in their programmes to study Canada, past, present and future, and to present facts to their members and the people generally relative to the history, the development, the resources, and the boundless possibilities of the country.

Canada's diamond jubilee year presents a glorious opportunity to all our organizations to make this a "Canada First" year. Would it not be a fine thing if, say once a month, every Canadian Club, Rotary Club, Kiwanis Club, Lions, Gyro, and other service organizations, every Homemakers and Community Club, the Canadian Legion, all fraternal bodies, I.O.D.E., Y.M.C.A., Y.W.C.A., United Farmers, churches and schools devoted a meeting to some one phase of Canadian life, history or development.

Indeed, why should the Departments of Education of the several Provinces not arrange a special programme of studies in regard to Canada, all designed to make our people better informed regarding the constitutional development of government in Canada, our position in the Empire, in the League of Nations, and better acquainted with the principles and procedure of government in Canada, the administration and enforcement of law, in a word, the growth and development of Canada from the status of a Crown Colony to a self-governing nation within the Empire and with full nationhood among the nations in the League of Nations?

This jubilee year presents a golden opportunity for the presentation of historical plays and pageants designed not merely to entertain and bring out the artistic qualities of our people, in their preparation and presentation, but also to instruct in a most effective way.

The twin Provinces of Alberta and Saskatchewan are this year celebrating their coming of age as autonomous provinces, and advantage is being taken of this occasion to depict in various ways the growth and development which has marked the past two decades. In a special way these facts are being presented by floats in parades in connection with our summer exhibitions. But why should plans not now be made, not only in the West, but throughout the length and breadth of the Dominion, to present at every exhibition next year through means of floats, parades and pageants the Canada of 1927 as contrasted with the Canada of 1867?

Canadians, it is true, are not much given to this sort of thing. We are a reserved people and hate to display our feelings and emotions. We are not given to flag-waving. But surely all can unite in making the diamond jubilee year of Confederation an exception. We have hundreds of thousands of citizens, both in other lands and under other flags, who have chosen Canada as the land of their adoption. This jubilee year should be so utilized as to acquaint them with Canada's past history and achievements, to instill in their hearts and minds a real pride in Canada, to enthuse them with a desire to be Canadians in every true sense and meaning of the name.

If for one solid twelve month the people of this Dominion thought, talked and preached Canada, the cumulative effect in the arousing and development of a real national spirit would be tremendous. It would operate to break down old barriers of race and creed, would wipe out purely sectional considerations, jealousies and suspicions, and create an entirely new spirit throughout the land.

Canada is worthy of the very best that her people can give to it. Let us unite, therefore, in giving to Canada one year of undivided loyalty, considered thought, and unselfish devotion—a year of study of Canada, a year of service in endeavoring to arrive at a fuller understanding of her problems and needs, a year of unremitting effort to solve those problems and meet those needs.

Objectionable Motor Signs

Move Made in New Jersey to Revoke Licenses of Motorists With Offensive Placards

Commissioner Dill, of the New Jersey motor vehicle department, said he will attempt to revoke licenses of motorists who display offensive signs beneath registration plates.

Commissioner Dill said he believed this step was the only possible one to abate the evil. He added it was wrong to offend the public with placards on which profanity even was hinted at.

One of the signs to which he objected particularly reads: "If you can read this you are too damn close."

Okanagan Lake Service

New C.N.R. Steamship Service On Okanagan Lake

Announcement is made of the opening by the Canadian National Railways of a steamship service between Kelowna and Penticton on the Okanagan Lake. A new steamship, the Penticton, will make two trips each way daily, except Sunday, starting July 15. This extends the passenger service which was put into operation with the completion some months ago of the new Canadian National line between Kamloops and Kelowna and gives a complete service from Penticton connecting with the Continental Limited east and west from Kamloops.

New Type Of Bandit

Confidence Men In England Use Crossword Puzzle As Lure

Crossword puzzle bandits are latest things in British crookdom. Even the Englishman's reserve cannot withstand the desire for advice in the search for words to fill the crossword puzzle squares. Hotel lounges are the favorite haunts of crooks who wrinkle their brows over a rare Australian bird in three letters, and then lean over to a prosperous squire from the country to ask for aid. Sooner or later the conversation turns to get-rich-quick schemes. Scotland Yard is on the trail of two crossword puzzle tricksters who posed as gentlemen farmers and separated a real dirt farmer from Aylesbury from his bank roll. The confidence men are described as suave and well-spoken but poor spellers.

2 Years' Backache Subdued by "Nerviline"

"Backache was the bane of my life, and for two years I was so lame as to be unfit for work," writes E. S. Sloane, from Georgetown. "While in Smith Bros' Drug Store, I heard of Nerviline being a wonderful pain-destroyer, so I decided to try Nerviline. Thanks to Nerviline, my two-years' backache was rubbed away, and to-day I am perfectly well."

All those who suffer from weak, aching backs, those whose muscles are stiff, whose joints are swollen, let them try Nerviline—the liniment that never fails. 35c at all dealers.

Manitoba Industries

The largest group of industries in Manitoba, in number of establishments, is wood and paper products, of which there are 213, according to figures compiled by the Industrial Development Board of Manitoba. Next in order come vegetable products, with 190 plants; chemical products, with 129; and textile products, with 89.

GIRLHOOD DANGERS

Come Through a Weakening of the Blood—A Tonic Is Needed

In their early teens it is quite common for girls to outgrow their strength, and mothers should carefully watch the health of their daughters at this time. It is when the strength is sapped by rapid growth that anaemia develops. The first signs may be noticed by peevishness, languor and headaches. The face grows pale, breathlessness and palpitation become apparent, with low spirits and depression.

Neglected anaemia often leads to a decline, but if you see that your daughter's blood is enriched, there need be no cause for anxiety. The finest blood-builder ever discovered is Dr. Williams' Pink Pills. They will build up your girl's health and ensure for her healthy womanhood. In proof of this Mrs. George Justason, Black's Harbor, N.B., says:—"I think Dr. Williams' Pink Pills a wonderful medicine. My daughter, Margaret, was in such a badly run down condition that we feared she was going into a decline. Her face was pale, the least exertion would leave her breathless and she suffered from headaches. She had no appetite and lost a lot in weight. Up to the time we began giving her Dr. Williams' Pink Pills, no treatment had helped her. But thanks to the use of this wonderful medicine she is again well and strong, showing no signs of the trouble that had so weakened her."

In all troubles due to weak, watery blood, Dr. Williams' Pink Pills will be found a reliable remedy. Sold by all medicine dealers or sent by mail at 50 cents a box by The Dr. Williams' Medicine Co., Brockville, Ont.

Invited To Palace

Spanish Workman Did Not Recognize King Who Gave Him Lift

Here is another story to add to the many good ones told about King Alfonso of Spain.

Driving recently just outside Madrid, the king's car came to a standstill, and a minor adjustment had to be made by the chauffeur. At that moment a tired-looking workman, who was walking in the same direction, came up, and, not recognizing the king, asked him for a lift as far as Madrid. The king, with a smile, told him to jump up, and the car conveyed him swiftly to his humble dwelling in the slums of Madrid. Then the king shook hands with the amazed workman, who had begun to thank him. "Good-bye old man," he said. "Have a good rest, and if you want anything at any time, come and see me at the palace."

Minard's Liniment For Sore Feet

W. N. U. 1637

A Superior Milk Cap

A milk cap should do more than fit the mouth of a bottle. It should also be easily removable—impervious to water—neatly printed.

All these features are combined in the Appleford milk cap. Made of quality board it hugs the lip of the bottle, yet is so pliable it is quickly removed. All pores are filled with wax to protect the milk from moisture or contamination. The printing is clear-cut and distinctive.

Use Bad Language

Modern Mother Responsible For Great Deal of Loose Speech

Bad language of the modern mother is responsible for a great deal of loose speech among school girls, Miss Mary Morrison, principal of the Francis Holland School for Girls, told the annual conference of the head mistresses' association in London.

"For years we have made allowances for father's strong language," Miss Morrison asserted, "but now mother is nearly as bad, and it is having a serious effect on the girl's speech among themselves. This is all a part of the so-called greater freedom."

Drives Asthma Like Magic. The immediate help from Dr. J. D. Kellogg's Asthma Remedy seems like magic. Nevertheless it is only a natural remedy used in a natural way. The smoke or vapor, reaching the most remote passage of the affected tubes, brushes aside the trouble and opens a way for fresh air to enter. It is sold by dealers throughout the land.

An Unexpected Sequel

Man Failing to Carry Out Death Pact Condemned For Murder

A death pact drama at Southport had an unexpected sequel. The young man aged 18 and his sweetheart of the same age agreed to commit suicide together. The girl died. The man failed to make good his share of the pact and as a result the court has condemned him to death for murder. The law holds that if two persons agree to commit suicide, and, in consequence, one of them dies, the survivor is guilty of murder.

The cheapness of Mother Graves' Worm Exterminator puts it within reach of all, and it can be got at any druggist's.

Population and War

Militarists in all countries demand an increasing population, in order that an unfailing supply of recruits may ensure the national safety in the next war; but then they also hold that wars are inevitable owing to the pressure of expanding populations.—London Spectator.

Minard's Liniment for Rheumatism

More Bicycles Than Cars

Every sixth person in France has a bicycle, the total number being about 6,400,000. There are ten times as many bicycles in the country as automobiles.

Moscow Shirks Responsibility

Could Have Prevented Financial Help Being Sent to British Strikers

Moscow obviously is lying when it tells Great Britain that it is unable to prohibit Russian "trades unions" from sending money abroad to aid trades unions in other countries and disclaim all responsibility for the financial help sent from Russia to British strikers while the general tie-up was on, and afterward, upon refusal of the managers of the strike to accept it, transferred to the miners' federation.

If, as the Soviet outfit asserts, there is no prohibition in its domain "against the remittance of money abroad, but only the obligation to obtain a permit for such remittance," that prohibition is lacking because the Moscow chiefs for their own reasons have purposely let down the bars, and the very statement that a permit is necessary is an admission that it lies within the power of Bolshevik Government to put them up again at any time, and in any particular instance, as it pleases.—Detroit Free Press.

Powerful Medicine.—The healing properties in six essential oils are concentrated in every bottle of Dr. Thomas' Electric Oil, forming one of the most beneficial liniments ever offered to the use of man. Many can testify as to its power in allaying pain, and many more can certify that they owe their health to it. Its wonderful power is not expressed by the small price at which it sells.

He had just arrived from the old country and was not familiar with the use of the telephone, so he took down the receiver and demanded:

"Aye want to talk to my wife."
The operator's voice came back sweetly, "Number, please?"
"Oh," he replied, "she bane my second run."

Use Miller's Worm Powders and the battle against worms is won. These powders correct the morbid conditions of the stomach which nourish worms, and these destructive parasites cannot exist after they come in contact with the medicine. The worms are speedily evacuated with other refuse from the bowels. Soundness is imparted to the organs and the health of the child steadily improves.

In a certain town in Italy the taxes are levied according to the weight of the taxpayer. The fat man is assumed to be prosperous and charged on his poundage.

If you find that you are being driven to despair, get out and walk.

Children Cry for

Fletcher's CASTORIA

MOTHER:—Fletcher's Castoria is a pleasant, harmless Substitute for Castor Oil, Paregoric, Teething Drops and Soothing Syrups, especially prepared for Infants in arms and Children all ages.

To avoid imitations, always look for the signature of *Dr. H. Fletcher*. Proven directions on each package. Physicians everywhere recommend it.

Genuine ASPIRIN

Proved safe by millions and prescribed by physicians for

Colds Headache Neuritis Lumbago
Pain Neuralgia Toothache Rheumatism

DOES NOT AFFECT THE HEART

Safe

Accept only "Bayer" package which contains proven directions. Handy "Bayer" boxes of 12 tablets Also bottles of 24 and 100—Druggists.

Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monosodium-acetate of Salicylic Acid (Acetyl Salicylic Acid, "A. S. A."). While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

NO DEARTH OF CANDIDATES IN FEDERAL FIELD

Toronto.—Two former Liberal cabinet ministers from Ontario who were defeated in October, 1925, will be in the running at the approaching federal election, it was stated here. Hon. George M. Gordon, former deputy speaker of the house and minister of immigration, will contest Peterboro, while Hon. Thomas A. Low, former minister of trade and commerce, will contest Renfrew.

It is expected that Right Hon. MacKenzie King will be offered the Liberal nomination in North York. Hon. E. C. Drury, former premier of Ontario is expected again to contest North Simcoe against W. A. Boys, Conservative whip.

The Globe carries the following item in its news columns:

"Rumor has singled out Hon. John S. Martin, minister of agriculture, as third member of the Ontario cabinet to whom one of Premier Meighen's Ottawa portfolios in the making may be held out. Premier Ferguson and Attorney General Nickle have already been named as possible selections for the federal ministry. Of the three Queen's Park men, Mr. Martin, it was believed in Conservative circles, would be the most likely to sever provincial connections for the larger theatre of activities at Ottawa."

Montreal.—"Le Devoir," organ of Henri Bourassa, former M.P. for LaBelle, gives prominence to the following:

"According to what can be learned today, one of the bombs which the Conservatives are preparing to launch is the re-entry of Sir Robert Borden, former premier of Canada from 1911 to 1919, into active politics in order to assist Mr. Meighen with his counsel and direction during the forthcoming electoral campaign. Mr. Meighen, within the past few weeks, has hastened to secure Sir Robert Borden's advice; the latter received him cordially and inspired certain of his decisions."

Fear Famine In Mexico

Floods Have Completely Destroyed Most of Crop

Mexico City.—Rising flood waters threatened Mexico City with complete isolation and fear is expressed here that the nation may face famine or a food shortage unless large quantities of food are imported to replace crops destroyed by the flood.

All railway tracks within 15 or 20 kilometres of the capital were covered with water and prospects that the train service between here and El Paso, Laredo and many interior points would have to be suspended.

In the state of Puebla a cloudburst over the Malinche Mountain caused a torrent that dug a path 15 feet deep and a mile wide and destroyed over a mile of track near the station.

Apparently there has been complete destruction of crops throughout the Mexican plateau and the loss is estimated at from 10,000,000 to 15,000,000 pesos.

A Miraculous Escape

Child Run Over By Train Escapes Injury

Parkhill, Ont.—To have a fast passenger train run over rails between which she was sleeping and emerge unhurt, was the strange experience of the two-year-old daughter of Ralph Robinson, of East Williams. The child owes her life to the fact that she lay in the exact centre of the rails and did not move while the train was passing over her.

The child had wandered away from her home and, evidently exhausted, stretched out on the warm clinkers on the Canadian National Railways right-of-way. Soon after she fell asleep and the train passed over her.

King Receives Lord Willingdon
London.—Viscount Willingdon, who is to succeed Lord Byng as governor-general of Canada, was received by His Majesty King George last week. It is understood that Lord Willingdon's recent mission to China in connection with the Boxer Indemnities was the subject of discussion, rather than his new Canadian appointment.

Armament Committee Adjourns Until August

Will Then Meet To Study Methods Of Limitation

Geneva.—The American delegation took a strong position in the disarmament discussions against the plan of comparing the armaments of countries by a comparison of the budgetary expenditures. The project was defeated by a large majority.

After the discussion, the military committee adjourned to August 1, when it will continue its examination of the technical aspects of disarmament, and study especially methods of limitation.

The League of Nations signalled the recess by issuing an official communique summarizing the work achieved, but refrained from comment or predictions.

The official communique lays stress on the expert's work in enumerating armaments as, first, the forces in service in peace time; second, the forces prepared for war time; and third, ultimate war forces created during hostilities by utilizing general resources. The power of a country in war time is declared to depend on those factors which constitute its power in peace and on the conditions of time and preparedness under which all its available resources may be applied in war.

Visit Is Not Political

Lord Clarendon Coming to Canada on Land Settlement Business

London.—Owing to recent political developments at Ottawa, rumors were circulating that the visit to Canada of Lord Clarendon, under-secretary for the dominions, was a mission of political importance. An instance of these reports is the statement of the London editor of the Yorkshire Post, who says that, besides discussion of overseas settlement, "it is recognized that before Lord Willingdon goes to Rideau Hall, someone should 'test the atmosphere' in Canada, particularly as regards the imperial conference and other such questions."

The Canadian Press was informed officially that Lord Clarendon will take up with the Canadian authorities only questions of land settlement. He sails on Saturday in company with T. C. MacNaughton, vice-chairman of the Overseas Settlement Board. They will travel across Canada, but will not make any public addresses. Their visit was arranged some months ago, it is stated.

Continue Customs Probe

Clean-up of Department of Customs and Excise Is Proceeding

Ottawa.—A clean-up of the department of customs and excise is now proceeding and will continue steadily, according to Hon. H. H. Stevens, acting minister of that department, who was asked this afternoon the extent to which he was prepared to go in implementing the resolutions adopted by the house in its concluding days.

It is believed that in a short time there will be the appointment of the judicial tribunal approved by the judges of the exchequer court. Its work would be to continue the investigation into the administration of the department and ascertain the best means of making the enforcement of the law more effective.

Abandons Work In Egypt

Sir Flinders Petrie Transfers Activities to Southern Palestine

London.—The famous Egyptologist, Sir Flinders Petrie, has decided to abandon research work in Egypt and transfer his archaeological activities to Southern Palestine, because of the "dog in the manger attitude of the Egyptian department under the French director Laoua."

Sir Flinders is quoted by The Daily Express in an interview detailing hindrances imposed upon research workers as saying that other skilled excavators at Thebes have abandoned their work and are compelled to spend their time studying discoveries they had made two years ago.

Cannot Get Coal

London.—The Daily Mail says almost complete stoppage of the Lancashire cotton mills is expected owing to lack of coal supplies. Very few firms have another week's supply and there is little likelihood of their getting more, owing to the miners' strike.

LABOR OPPOSES COAL PURCHASES FROM GERMANY

London.—Lively scenes were enacted in the House of Commons during consideration of the vote on an appropriation of £3,000,000 to pay coal bills abroad for fuel purchased by the government since the miners' dispute began.

The Labor members vigorously opposed buying more coal abroad; some of them did not mince words about it, but nevertheless the vote carried 243 to 116.

John Wheatley, who was minister of health in the Labor cabinet, objected particularly to the government buying coal in Germany to beat the British miners, who responded to the call to defeat the Germans in 1914.

The tilt in the house came upon the heels of an announcement in the House of Lords that the Yorkshire mineowners had consented to offer the same ratio of wages and profits as other districts, thus removing a stumbling block and making it possible that the final stages of the eight-hour mine bill may be reached.

Demands Dismissal Of British Officer

Canton Government Annoyed Over Alleged Threat to Close River Port

Canton.—The Canton Government has demanded the dismissal of the British senior naval officer here because he is alleged to have threatened to close the port of Wu Chow on the Sikiang River, west of here, against Chinese shipping if pilots are not permitted to take British warships up the river to investigate the death recently of J. M. Phillips, a British subject. Phillips, British manager of the Asiatic Petroleum Company, was slain by bandits after being kidnapped.

Prepare To Harvest Crop

Alberta Making Plans To Secure Supply of Harvest Help

Edmonton.—First move in the direction of harvest help supplies for the crop that is now growing has just been made by the provincial labor branch, which has completed a preliminary survey of the wheat belt for the purpose of ascertaining this year's acreage. The next step will be a conference with the Western Passenger Association in Winnipeg, in which Alberta will join with the other western provinces. This is set for July 16 and Walter Smitten, government commissioner of labor, will attend as Alberta representative.

Hon. Herbert Greenwood Weds
Edmonton.—The marriage of Mrs. Marjorie Greenwood McCormack and the Hon. Herbert Greenwood, former prime minister of Alberta, was very quietly solemnized here, at the home of the bride's sister, Mrs. W. H. Banford and Mr. Banford, 1128-102 Ave. Only immediate relatives witnessed the ceremony, which was performed by the Rev. Dr. McQueen, of First Presbyterian Church.

Two Dolls on Empress World Tour

Two of the tiniest passengers on board the Canadian Pacific liner Empress of Scotland, making the cruise Around the World, were Mesdemoiselles Fifi and Georgette, a pair of marvellous dolls which amused the grown-ups. Fifi is a real Parisian blonde and doesn't even know what peroxide is. Georgette is a brunette whose eyes more than once turned in the direction of some lucky stalwart male. Dressed in the height of fashion, the two mannikins were given an airing on board the deck of the Empress of Scotland almost daily. At the left, above, is Fifi on the lap of an admirer, while on the right is Georgette in the arms of another charming passenger.

Snowslide In B.C.

Occurred East of Revelstoke But No Casualties Reported

Vancouver.—Carrying hundreds of huge boulders weighing two or three tons each, a veritable river of water, and big timbers poured across the Canadian Pacific Railway tracks near Lauretta, about 16 miles east of Revelstoke, B.C.

An engine and four cars of a work train were swept from the track to the banks of the Illecillewaet River, while another car is missing and is believed to have been buried under the avalanche. It is believed no one was in the car.

Thousands of tons of wet snow moved down the mountainside with a reverberating roar, covering the tracks with six to eight feet of water for a distance of about 700 feet. A portion of the track was washed out, necessitating rerouting. Telegraphic communication was temporarily disorganized.

The intense heat of the past few days together with heavy rainfall is believed to have been responsible for the slides.

London Has Meat War

Rival Packing Firms Cutting Prices Away Below Cost

London.—A meat war is raging in London, says The Daily Mail. Argentine beef has been selling this week at Smithfield, London's central meat market, at less than it costs to import it.

The Daily Mail, which is investigating the circumstances, traces the low price to a war among rival meat packing firms. The newspaper declares the war is being waged with relentless fury, notwithstanding that everyone denies its existence.

During the past year, The Daily Mail declares, firms concerned in importing beef from Argentina are estimated to have lost anything from £4,000,000 to £10,000,000. Nevertheless importation continues without any concerted regard for public needs and apparently will continue until one of the big concerns has found courage enough to admit it cannot go on losing money as all have done during the past year.

Relic Of Former Days

Manitoba Historical Society Is To Get Historic Cannon

Winnipeg.—Some of the cannon that were used in the old Hudson's Bay Company's post, Fort Garry, the creeper-covered gateway of which alone remains, are likely to come into the possession of the Manitoba Historical Society, which was recently organized.

The guns were mounted for action when Louis Riel held the fort till he fled at the approach of Col. Wolseley's troops. Another interesting relic of the Red River settlement days that has been donated to the society is a Red River cart. Historic societies in other parts of the Dominion have offered to co-operate with the local organization.

Armed Guards Watch Exams
Paris.—Any student who cheats at the Sorbonne will have his nerve with him. Members of the Republican Guard in full uniform and armed with bayonets watch examinations.

THE QUESTION OF EQUAL STATUS FOR DOMINIONS

London.—The issue of dominions and treaties was raised in the House of Lords when Lord Parmoor, asking for information on the nature of obligations which treaties contracted by Great Britain impose on the dominions, called attention to the inconsistency arising from the fact that the dominions were subject to dangers and obligations if Great Britain declared war to enforce treaties, whereas the dominions after the war they had helped to win, were now claiming the positions of equal partners who have achieved full status.

Lord Clarendon, under-secretary of state for dominion affairs, replying for the government, said the importance of the issues raised were realized and they would be discussed at the imperial conference. He had only recently received a report of the debate at Ottawa and had not yet found time to digest it.

The under-secretary said the government was most anxious to assert fully and strongly the importance they attached to the principle of equal status and said it was his opinion that the strength of the empire did not depend on the form of constitutional principles as much as the belief of the people in the righteousness of the cause they upheld.

Railway Union Upholds Chief

Gives Vote of Confidence to Veteran British Labor Leader

Weymouth, Eng.—Hon. J. H. Thomas, general secretary of the National Union of Railwaymen and one of the leaders in the settlement of the recent general strike, has received another vote of confidence from his union.

A demand for his dismissal, because of his conduct during the general strike was supported by only six of the delegates to the union's conference.

The resolution demanded his resignation for signing the award of the National Wages Board, whereby the railwaymen were not given the unified grading they had asked.

It was defeated by an overwhelming majority.

Britain Has New Flying Boat

Machine Just Completed Is Intended For Submarine Spotting

Hull, England.—A new triple-engine flying boat, features of which are jealously guarded, has been taken on her trials. Built at the Brough aerodrome of the Blackburn Aeroplane and Engineering Company, the flying boat has been named "Iris." She has, it is stated, taken two years to construct, and has cost £60,000. Her maximum engine capacity is given as 2,000 h.p. The machine is intended for submarine spotting and general reconnaissance work.

There is accommodation for a navigator, three pilots, and a crew of about ten men. The trial flight was, it is said, satisfactory.

To Study Law In Quebec

Premier's Son To Be Student At Laval University

Quebec.—Theodore Meighen, son of the prime minister, is among the candidates for admission to the study of law who are now here for the semi-annual examination of the bar of the province. Mr. Meighen is entering Laval University here in the fall.

In all, 141 candidates for admission to either the study or practice of law are taking the examinations.

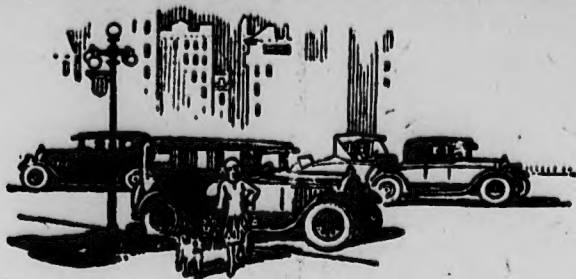

Meighen Denies Report

Ottawa, Ont.—"The report is ludicrous, calculated to stir up mischief only, and is made of whole cloth," declared Premier Arthur Meighen in referring to a published report that his acting ministers had resigned and that at the present time the government of Canada was vested in Lord Byng, acting on the advice of Mr. Meighen.

Heavy Rains In Japan

Tokio.—Heavy rains in Western Japan have drowned thirty persons and destroyed about 4,500 houses.

WEDNESDAY, JULY 21st

PEOPLE

VERSUS

Nancy Preston.

Local and General.

Rev. Roppel and family are spending a vacation at Banff.

Fred Hyde accompanied by his daughter, left for the coast on Monday.

Mrs. J. W. Phillipson left on Tuesday for Winnipeg, where she will visit with friends for a time.

Mrs. David Pearson of Vancouver is visiting her daughter, Mrs. W. J. Loader, east of town.

Miss Ruth Brubacher has taken a position with J. V. Berscht and Elwood Evans accepted a temporary salesmanship in the same establishment.

With the object of increasing its membership the Tennis Club announces a fifty per cent cut in its fees.

Harold Stauffer spent the week-end here, afterwards leaving for Cockran, where he will put in a spell relieving.

The U.F.A. will hold their annual barn dance in Dave Irwin's barn on Friday July 23rd. Reserve this date.

Rev. Hayes will be away for several weeks, and during his absence no service will be held in the United Church.

Mrs. A. McNaughton left on Monday for Vancouver, where she will meet her husband and son Laurence, who left here a week ago by auto.

J. C. Clarke, manager of the Bank of Montreal, is away on a vacation of three weeks. During his absence H. E. Jones of Calgary will assume charge.

Richard and Keith Amer, with Ormond Phillipson, were each successful in their recent music exams. Another candidate, W. Boorman, was equally successful in an exam for the violin.

John F. Miller, eyesight specialist of 404 Underwood Block, Calgary, will be at the hotel in Didsbury on Saturday, July 24th. Tell your neighbors he is better equipped than ever.

Owing to the mild weather experienced last winter the ice crop was short, and the hot weather now being experienced has resulted in such a heavy demand that the ice-man in Calgary has declined to permit further shipments to outside points.

Mrs. H. Gabel has visiting with her this week her niece, Miss Ella W. Dahmer, who with a party of young people left Kitchener June 14, on a five months tourist excursion. The trip will include several points in Alberta and afterwards extended to Vancouver and other coast points, returning home via the States.

Miss Dahmer arrived here from Edmonton following an auto trip to Yellowstone Park.

Didsbury will be represented at the Innisfail golf tournament this week by S. G. Watt, Bert Cressman and Jim McDougall, who leave to-day. This is a good, aggregation, and if the same form maintained by them during the summer is displayed at Innisfail members in the latter town will have to go some.

Apparently, the whole of the Canadian west has been experiencing during the last week a spell of weather such as only the equator can generally furnish. Sunday here at Didsbury, it was 90 in the shade, and by far the majority of the residents left early for shady nooks and sylvan glades. The Little Red tempted many others spent the day at Sylvan Lake and the Dog Pond, where swimming and bathing were freely indulged in.

The W.C.T.U. will meet at the home of Mrs. J. H. Hehn on Wednesday, July 21st, at three o'clock. This will be a parlor meeting and all members are requested to be present. Two papers will be given, one being the report of the district convention held in Ods, and the other on the subject of "Alcohol an Narcotic."

W. H. Chamberlin received a surprise on Monday, when his youngest sister, Mrs. Chas. Fraser with her husband arrived from Ottawa on a visit. This is the first time the brother and sister have met for thirty-five years, and the re-union therefore is a most pleasant one. Mr. and Mrs. Fraser are on an extended trip through the west, and after leaving Didsbury will travel via Prince Rupert and Victoria to the Kootenay, where a visit will be paid another brother.

Walter Scheidt is enjoying a visit from his brother Herbert of Spokane. The latter will probably remain a couple of month's.

H. W. CHAMBERS

The rapid development of the fish oil and fish products industry on the Pacific coast this year may necessitate the fitting up of three coastwise vessels as tankers to carry oil from the reduction plants. Last year one vessel found this method successful. Fish reduction plants, it is estimated, will produce 10,000 tons of fish meal and fertilizer this year.

President E. W. Beatty, of the Canadian Pacific Railway, has asked approval of the shareholders for the construction of two new passenger vessels of the type of "Montcalm," "Montclare," and "Montrose," to be available for service in May, 1927, and five freight vessels of 8,500 tons, with a sea speed of about 14 knots, also to be ready for 1927.

During the past season 1,235 moose and 3,508 deer were killed in New Brunswick. Of the former 207 fell to the guns of non-resident hunters and 617 of the latter. In the same year animals killed for fur included 1,567 raccoon; 6,017 skunk; 18,314 muskrat; 5,410 foxes; 9,470 ermine; 177 martin; 2,823 mink; 105 otter; 67 fisher and 192 bear.

The Canadian champion two year old Ayrshire heifer, "Princess Beatrice" 3rd, owned and bred by the Nova Scotia Agricultural College, has another record in supply of milk and butter fat. From January 12 to March 15 she produced 4,010 pounds of milk, an average of 67 pounds a day. Butter fat was 220 pounds for the same period, equal to 275 pounds of butter.

Their Majesties King George and Queen Mary paid a private visit to the first Exhibition of Paintings and Sculpture by Canadian artists which is being shown in London. Among the exhibits are pictures by Leonard Richmond of Lake Moraine, Lake O'Hara and Lake Louise, painted by the artist during his visit to the Canadian Rockies last year with the Trail Riders.

According to an announcement by D. C. Coleman, vice-president and general manager of western lines of the C.P.R. at Winnipeg, the Canadian Pacific Railway is to construct a hotel of 200 guest rooms on a downtown site at Regina. This hotel is being built in response to a request voiced on many occasions by representatives of the citizens of Regina.

Seven First Prizes at Calgary.

Local Exhibitors Clean Up in the Pony Class.

With a combined exhibit at the Calgary show last week of Welsh and Shetland ponies, Messrs. J.V. Berscht and W.E. Reiber of Didsbury carried everything before them and brought their names prominently before thousands of people, and incidentally the district in which they reside.

Both parties have shown at Calgary repeatedly, and on almost every occasion been successful in being awarded major honors. This in spite of keen competition from outside points. This year, however, they have done better than ever before, and include among their awards seven firsts: second and one third.

Brae Don, a Welsh stallion, took first.

Lady Bell, a Welsh mare, two firsts.

Didsbury Lass, Welsh pony, third.

Peggy, Welsh pony, first prize.

Gipsy Bell, Shetland pony, first.

Forest Queen, Shetland, first and second.

Team ponies, Shetland, first.

The first and second prizes were also secured for the best children's turnout.

Didsbury Fall Fair August 10th-11th

Exhibitors Prepare for Fair.

The twenty-third annual exhibition of the Didsbury Agricultural Exhibiton, to be held on August 10th and 11th, promises to be just as successful as last year and judging from the great interest being displayed the number of exhibits will probably top the list. Many of the town residents are expecting to show something either in fruit or flowers, and from many points in the country districts assurances have been received that interest is becoming keener as the fair draws near.

It is hoped to have the prize lists ready next week.

Charles Reddock, housemover of Calgary, Alta., has undertaken what seemed to be an impossible task of moving sixty houses over mountain roads from Bankhead to Banff. In forty days he moved thirty-eight of the houses six and a half miles.

Exports from Canada for the month of February were \$87,512,147 while imports were recorded at \$70,908,980 for the same period. For the twelve months ending February 28 last, exports reached a value of \$1,297,744,683 while imports were fixed at \$911,107,055.

One of the largest business transactions recorded in the West took place here on March 11th last when the Canadian Co-operative Wheat Producers mailed approximately 190,000 cheques amounting to a total of \$37,000,000, to members of the wheat pool.

QUALITY AT LOW COST

WORLD HAPPENINGS BRIEFLY TOLD

The military committee of the preparatory disarmament commission adjourned until August.

Thirty-one deaths and damage estimated at \$3,000,000 are attributed to the recent storms and floods in Germany.

Dr. Otto Ludwig, Weidfeldt, former German ambassador to the United States and director-general of the Krupp Works, died July 5.

The Swedish Government, growing tired of having so many drownings every year, has started a drastic campaign to force everyone to learn to swim.

Joseph Courtenay, 77, veteran of the Riel Rebellion in 1885, at one time Indian agent at The Pas, Man., and also connected with the Indian department at Prince Albert, is dead at New Westminster. He was a native of Ireland.

Seven marshals of Italy, in addition to the King and Premier Mussolini, have promised to be present at the elaborate ceremony when the foundation of the Victory Monument is laid at Bobzano, Italy.

Advices from Lenz say enormous damage has been caused in a large section of Upper Austria by floods, caused by cloudbursts. The dispatches say there has been loss of life but no figures are given.

The administration of the Hohenzollern family has notified the Prussian state of the willingness of his clients to resume negotiations concerning the disposition of the property in the state owned by the former royal family.

The London Daily News' political correspondent states that Lord Byng's action in refusing dissolution to former Premier W. L. Mackenzie King will be brought up for discussion by one of the Dominion premiers at the imperial conference in October.

The United States submarine S-51 rammed and sunk off Block Island by the steamer City of Rome last September, was towed to the Brooklyn navy yard. The submarine, which had 33 aboard, when it went down, was raised after a series of unsuccessful attempts. It is believed the submarine contains the bodies of 25 sailors.

Equal Political Rights

British Women Under 30 to Fight For Franchise

British women are about to open a vigorous fight to do away with present suffrage laws which exclude them from the right to vote until they are 30 years old.

Many prominent men have agreed to join a great mass meeting staged by forty women's societies in the interest of equal political rights. Among them are Lord Balfour, Lord Cecil and Peithwick Lawrence, M.P.

George Bernard Shaw, the noted playwright, however, has declined to participate.

Under the present suffrage laws in England, 5,000,000 women above the age of 21, but below the age of 30, are unable to vote while qualified men above the age of 21 have the ballot. All the old time suffrage leaders and thousands of other prominent women resent this discrimination.

Fail To Scale High Peak

Mountain Climbers Experience Hardships In British Columbia

Repulsed by British Columbia's 13,000-foot "mystery mountain" after a 32-hour struggle for victory across huge glaciers and high snowfields in the hitherto unexplored heart of the coast range, an Alpine Club expedition came close to facing actual starvation on the homeward trip, according to members of the party who returned to Vancouver. They spent five weeks in satisfying themselves of the existence of such a great peak within 150 miles of Vancouver and in sight of tidewater at the head of Bute Inlet.

The climbers reached an altitude of 10,000 feet on June 24.

One Habit Japan Will Not Tolerate

Prefect of Police Recently Issued Statement Against Kissing

Kissing is decidedly under the ban in Japan, where the art of osculation is described as an "unclean and immodest habit." Recently the Prefect of Police in Tokio issued the following statement:

"Kissing is a custom entirely foreign to Japan, and it is undesirable that it should be introduced into our country. It is uncleanly, immodest, indecorous, ungraceful, and likely to cause the spread of disease."

This "immodest habit" is so thoroughly repugnant to the Japanese nation that the wonderful statue, "The Kiss," by Rodin, the great French sculptor, sent to Japan for exhibition, has been placed in a public park with a huge bamboo screen around it, so that the sensibilities of the public may not be shocked.

Distinctive In-Line and Fabric

The dainty printed frock, the epitome of the new season, finds expression in the gracefully flaring lines of the model pictured here. Details that go to make the chic and successful frock for women of larger figure are combined in the softly molded lines of the bodice, the deep V front opening, and scarf-like collar. Also, it adds revers and a set-under button-trimmed vestee of the same contrasting material as the collar and tab cuffs, which trim the long, tight, set-in sleeves. No. 1245 is in sizes 36, 38, 40, 42 and 44 inches bust. Size 38 bust requires 5 yards 36-inch figured material; 3/4 yard plain contrasting. Price 20 cents.

Every woman's desire is to achieve that smart different appearance which draws favorable comment from the observing public. The designs illustrated in our new Fashion Book are originated in the heart of the style centres and will help you to acquire that much desired air of individuality. Price of the book 10 cents the copy.

B.C. Fisheries

The fisheries production of British Columbia in 1925 had a total value of \$22,320,253, compared with \$21,257,567 in 1924, according to a report of the bureau of statistics. The value of last year's production exceeds that of any previous year's output, excepting that of each of the years 1918 and 1919. Salmon fishery is of chief importance, the value of its products in 1925 amounting to \$11,966,145, or 67 per cent. of the total. Halibut and herring fisheries were next in importance.

Not a Blow

"Gracious, but you were gone a long time!" exclaimed Nell. "Have a blowout?"

"No!" replied Ada in disgust. "He never spent a cent!"

How Russia Conveys Money To Strikers

Sent to Communists By State Mails Says Whitehall Gazette

The methods by which Russian money for the striking British miners was sent into England during the general strike, and is still being sent, is described in the Whitehall Gazette as follows:

"A sum of money, in one pound and five pound notes, is placed in a red envelope in Moscow. This envelope is placed in a diplomatic valise, and the whole is consigned to one of the secretaries of the Soviet Legation at London. He, in his turn, passes the envelope, unopened to a woman—a member of the (British) Communist party. This woman meets a male member of the Communist party in a room in St. Bride Street (London). The man leaves St. Bride Street on a motorcycle for an unknown destination, believed, however, to be the head office of the Communist party."

Large payments, it is believed, are made in the form of cheques to members of the "underground" section of the Communist party, who are known only to two or three of the high officials. Most of these men carry on some sort of business, so that if the necessity arises they can prove that the cheques received by them from Riga, Berlin, Paris, Vienna, are legitimate business payments. A constant caller at the offices of the Miners' Federation has been identified as an official of the Soviet Legation in London.

New British Industry Growing

Firms Making Artificial Silk See Infinite Possibilities in New Material

The rise of the artificial silk industry is marvellous. Scarcely more than two or three years old, already one British firm alone supplies one-third of the world's demand for artificial silk. The assets of this company are valued at \$100,000,000. A plant in Coventry delivers seven miles of artificial silk thread a second—made of pinewood pulp. Ten thousand workmen in Bradford are employed to dye this product. The town of Leicester turns out fifty thousand pairs of artificial silk stockings a year. The Lancashire cotton weavers are adapting their mills to the industry. This new material, at once utilitarian and beautiful, has become the staple fabric for shawls, stockings, dresses, underwear—and its possibilities are only something short of infinite.

It is a fascinating story and a heartening one. It shows there is life yet in the old dog John Bull, notwithstanding all the croakers. And it shows, incidentally, that the controversy about the proper name for artificial silk is a serious matter. For it is certain that this silk by any other name is destined to be a household word in all the world.

Largest Electric Locomotive

Driven By Six Motors Has Had Trial Trip At Berne

The largest electric locomotive in the world, constructed by Geneva engineers, was successfully tested in its first trial trip at Berne. The monster weighs 283,350 pounds, is more than twenty metres long and is driven by six motors, with a total force of 4,500 horsepower. The locomotive, which can be driven by one man, can easily attain a speed of more than 100 miles per hour hauling an express train. It will be shortly employed upon the International Electric Line of Berne Loetschberg-Simplon, where the present service will be accelerated.

Our respect for old age depends greatly on whether it is applied to men and women or to boarding house poultry.

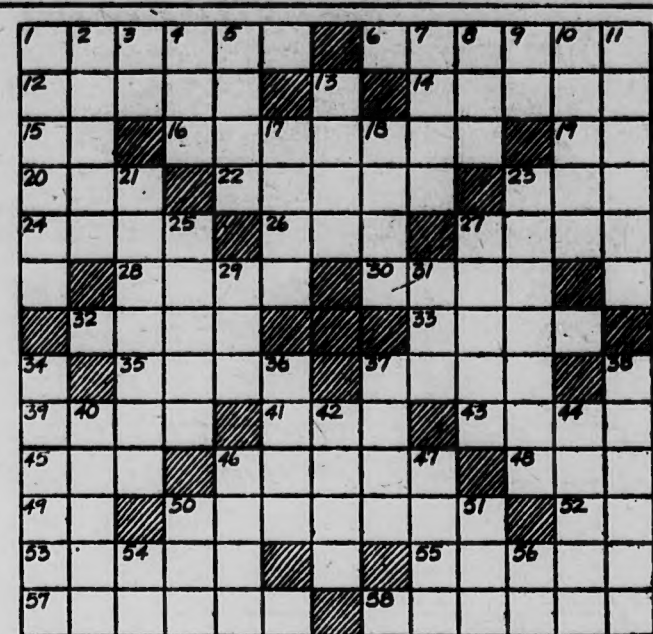

Possibly the tide has something to do with the numbers of knots made by a vessel.

Oh, My Back!

Get someone to massage it thoroughly with Minard's. It relieves pain.

SUNDAY SCHOOL LESSON

JULY 18

THE CALL OF MOSES

Golden Text: Certainly I will be with these. Exodus 3:12.

Lesson: Exodus 2:11-4:18.

Devotional Reading: Psalm 90:12-17.

Reference and Comments

Moses Called to be the Agent of God in a Great Undertaking, Exodus 3:10.—"The biography of great men is not confined to public events. It relates the incidents which are private, and describes the experiences which are spiritual results. Thus it was with Moses; we must be with him in the wilderness in order that we may understand his conduct at the head of the host of Israel." The summons to become the leader of his people, deliver them from oppression in Egypt and bring them forth on their way to the Promised Land, came to Moses in Horeb.

"Only in the sacredness of inward silence does the soul truly meet the secret, hiding God. The strength of resolve, which afterwards shapes life, and mixes itself with action, is the fruit of those sacred, solitary moments. There is a divine depth in silence. We meet God alone" (Dr. F. W. Robertson). There before—a bush that burned and yet was not consumed, Moses heard God speaking to him. As the account of the temptation of Christ in the wilderness must have come from himself, and his pictorial way of portraying his inner experience, so the account of the call that came to Moses in the wilderness must have been told by Moses himself and may have been given by him in a pictorial way. The burning bush may be a representation as outward of something that was inward—the flame of enthusiasm for a great cause. Be that as it may, it is assuredly true that Moses had the power to see the divine origin of the glowing beauty of the bush; he was able to see God in the things of everyday life.

Canada Reverts to Gold Standard

Canada has now reverted to the gold standard. In other words, any holder of paper currency issued by the Canadian Government or by any chartered bank in Canada, may exchange his paper for gold—if he wants to. Canada is nominally a gold standard country, but during the war found it necessary, for financial purposes, to suspend payment in gold, and the paper money issued by the banks was made legal tender. Penny postage is now in effect.

It is rather a curious fact that the three popular beverages, tea, coffee and cocoa, all were introduced into Europe within a few years of each other.

Giving good advice is all right—if we give it to ourselves.

Answer to Last Week's Puzzle

Given Safe Transport

Silver Coins From Royal Mint Delivered During Strike in London

Loaded with coins of silver, weighing 4½ tons, a motor lorry journeyed safely during the strike from the Royal Mint in London to Greenock, and saw the specie safely stowed on board H.M.S. Warspite for Cyprus and other eastern points. On the lorry were three armed policemen, two special constables, and two drivers. The journey of about 400 miles was made in 48 hours, and very few stops were made, the drivers taking turns at the wheel. Except when stopping for petrol, they were on the lorry the whole time, and even ate on the lorry during the journey. The silver was in stout packing cases, covered by a tarpaulin, and there was nothing to indicate the nature of the freight.

The twenty-six letters of the alphabet can be transposed 620,401,448,732,239,129,369,000 times.

For COLIC AND CRAMPS PAINS IN THE STOMACH There's Nothing Equals

It has been in use for over 60 years; its action is pleasant, rapid, reliable and effective, and relief comes promptly.

Self-Controlled Aeroplane

World's Largest Passenger Liner
Virtually Files Itself

The huge Vickers Rolls-Royce Vanguard air liner, the largest passenger aeroplane in the world, has been fitted with a new gyroscopic control, which once in the air can be set to fly the machine on a given course without the pilot again touching the controls, and is now to undergo a series of day and night flying tests on the Imperial Airways.

This air giant with its new control gear virtually files itself. Once it is set on its course it continues to fly level even though the pilot vacates his seat—in fact, in an actual test flight the pilot left his controls and sat in the cabin reading a newspaper for half an hour before returning to his cockpit to find that the machine was still flying steadily on its course.—London Observer.

Clean to handle. Sold by all
Druggists, Grocers and
General Stores

caught her breath at the originality of this thought—the men matched the women whose jeweled throats shone velvet white against their black shoulders!

And the music—soft exotic strains that laughed and sobbed their rhythmic ecstasies. Jazz, of course, but not the kind she had ever heard. A super jazz that called to her with its melodies of lulling romance. Her feet were still and her slender, warm pulsed little body was quiet, but her soul was dancing; the gleams in her deep brown eyes were dancing, and through her brain new sensations danced. Brandon was wholly sensible of the little dramas that flitted across the eager face he eyed so curiously.

"I would like to dance," Joanna exclaimed, suddenly. "Shall we?"

He rose instantly, and swept her into the maze on the floor. Joanna observed that women, when they had looked into Brandon's face and recognized him, shifted their eyes quickly into her's. What she saw in their glances puzzled her; she recognized something speculative, as if these women who knew the man whose arm encircled her and who danced as none of Joanna's partners danced, had a common curious regard for his unknown companion. She concluded, shrewdly, that women would profess to not like Brandon, but were secretly fascinated by him. She felt uneasy, again, and was glad when the encore finished.

"Now the questions," she challenged him, abruptly, when he had held a light to her cigaret and then to his own.

"But I haven't made a program of them," he protested—once more his voice was like a caress. "I promise to combine them all into one, or two, at most; and be content with whatever you conclude to tell me. What are you going to do?—that, of course, is the first one."

"And that's longer than any list any man ever put to me," she assured him. "Yesterday morning I went to my job at the store wondering if I could get along for two weeks' salary. Tonight I'm wondering where to begin to spend money. You see one of my plans—the first one I made got all smashed up somehow, I don't know how—but it's gone, anyhow." Brandon probed deep. "That was a most interesting chap who waited for you last night—in the drawing room," he ventured. "I wonder if the smash you have in mind came after I left you?"

Joanna looked out into the room, as if, in the brilliance of the scene to soothe her memory of the hours in the "drawing room only" after Brandon had gone.

"Yes," she admitted, quietly. "After you left. You see John was all that I had, the only one to share with. He

dug a knife into me and twisted it around."

"That shouldn't be serious," Brandon observed. "Wounds of that sort are easily healed. He'll soon be thinking better of his temper—and his suspicions."

"I am not so sure of that!" she returned quickly.

"He doesn't understand me—it seems as if nobody does. But he was the only one who hurt. It would be easy to straighten out his mind, of course. But he couldn't preach at me, any more. That would make him uncomfortable."

"Was it, then, so serious? Is he so very necessary?"

Joanna shot a quick glance at her questioner. "I decline to answer that now. You said there was to be a second question—what is that one?" "You have already answered it," he murmured. "It had to do with—John. I won't ask any more about him. I am to be his rival, you know."

Brandon's habit of saying this sort of thing so easily, worried Joanna. Any of her boys fumbled dreadfully when they attempted deft gallantries.

"I believe you could look into any woman's eyes and say, 'I love you' with a free conscience and without a quiver," she challenged him.

He laughed softly. "You will find few men, in your new career, who will hesitate with such a vow," he replied. "And, I fancy, you will not be long learning how to meet all such emergencies."

"I shan't fear the men," she agreed. "It's the women. I wonder how I can bring myself to measure up. You see I realize that I shall have to learn a lot of new—well, learn a lot!"

"I'd give most anything if you would finish your phrase—a lot of what?"

(To be continued)

Sign Posts Of the Sea

Sailors Gain Information From Buoys
Which Mark Certain Places

As the traveller by land looks to the fingerposts at cross roads and elsewhere for guidance on his journey, so does the sailor gain information from the buoys or signposts of the sea which mark the water at certain spots.

But, unlike the ordinary fingerpost, these sea buoys would convey little or nothing to the landsman at first sight, because the meaning of buoys is a subject that must be studied before it can be understood.

For instance, certain buoys of a recognized shape may always be looked for in certain positions when you are making for a harbor or river from seaward. In such cases your course will be marked by "starboard-hand" buoys—on your right—and "port-hand" buoys—on your left.

A starboard-hand buoy must always be painted in only one color. A port-hand buoy may be in single color or parti-color, but its color must differ from that of the starboard-hand buoy. The spherical buoys, marking middle grounds, must be painted with white horizontal stripes. The beacons surrounding buoys must be painted in a single dark color.

No man or woman should hobble painfully about because of corns when so certain a relief is at hand as Holloway's Corn Remover.

Little Helps For This Week

Blessed be he of the Lord, who hath not left off his kindness.—Ruth, ii, 20. Nor hath thy knowledge of adversity Robbed thee of any faith in happiness.

But rather cleared thy inner eyes to see
How many simple ways there are to bless.
—James Russell Lowell.

If we had lost our own chief good, other people's good would remain; and that is worth trying for. Someone can be happy. I seemed to see that more clearly than ever when I was wretched. I can hardly think how I could have borne the trouble if that feeling had not come to me to make strength.
—George Eliot.

The Deaf Hear

More than 80 per cent. of the children in the deaf and dumb institutions of Hull, England, have heard speech and music for the first time, through use of a device invented by a Hull civil engineer, the British official wireless report states. The apparatus looks like a small wireless receiving set, and permits sound to travel to the inner ear of deaf patients.

GIVE CONFIDENCE
TO YOUNG MOTHERS

By Always Keeping Baby's Own
Tablets in the Home

A simple and safe remedy for the common ills of babyhood and childhood should be kept in every home where there is either a baby or a young child. Often it is necessary to give the little one something to break up a cold, allay fever, correct sour stomach and banish the irritability that accompanies the cutting of teeth.

Experienced mothers always keep Baby's Own Tablets in the home as a safeguard against the troubles that seize their little ones so suddenly and the young mother can feel reasonably safe with a box of these Tablets at hand and ready for emergencies.

Baby's Own Tablets are a mild but thorough laxative that act without griping and they are absolutely guaranteed free from opiates or other harmful drugs. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

A philosopher says that every failure is a step toward success. This explains why some men become richer every time they fail.

Excellent for Croupy Children.—When a child is suffering with croup it is a good plan to use Dr. Thomas' Electric Oil. It reduces the inflammation and loosens the phlegm giving speedy relief to the little sufferer. It is equally reliable for sore throat and chest, earache, rheumatic pains, cuts, bruises and sprains. Dr. Thomas' Electric Oil is regarded by many thousands as an indispensable of the family medicine chest.

An English gramophone company celebrating its twentieth anniversary, says that the "most popular songs" in its long list are the "old favorites" and not the new songs.

CHAPTER IX.

Joanna Answers Questions

Brandon watched the girl who sat opposite him, across the little table. The wraith-like smile—the smile that irritated while it taunted, hovered slyly at his lips, and in his eyes. The girl he watched breather quickly, alertly, while she surveyed the bright scene around them. Her eyes leapt into far corners of the pink and gold hung room, in among the dancers and the other vis a vis tables like their own. Suddenly her glance met Brandon's. She nodded at him, as if she had surprised his reflections, whatever they were.

"It was good of you to come," Brandon murmured. "Presently it will not be such a simple matter to win a tete a tete from you."

"After awhile, I hope, you will tell me what you know and I don't know, of what 'presently' is to be for me," Joanna returned, the serious cloud which was never far absent, showing again in her face.

"We shall have to make a new bargain," he said. "That you will accept from me completely that I am only a spectator to your extraordinary circumstances. I shall be part of them, only as you give me favor. What are you?"

"Please!" Joanna interrupted. "Not now—not just yet! Of course a man always has a list of questions to put to any girl he is just getting acquainted

with, at least that's what I've found, and your list is longer than most, I suppose. I've always had the answers—learned them by heart, you know, but they won't fit now. So I shall have to think when you start in. And I don't want to think—just yet. About myself, I mean."

She fell to looking about the room, again, eyes wandering restlessly, but shining with the inner setting of the moment.

Brandon had come for her—he had chosen the brightest of the fashionable rendezvous for their evening.

Brandon had come to her, as they had agreed, in the wake of the flowers she had found, in their tissue boxes, awaiting her when she returned with George from their gay round of shopping after her visit to Graydon's office. One of the blooms now clung to her waist. Brandon, as he eyed her, compared its delicate perfections with the more buoyant loveliness of its mistress—a loveliness still marred, he saw, by the too elaborately penciled eyebrows, the beaded lashes copied from a screen close-up, and lips that betrayed a new attempt at reserve but still were much too Cupid-like. They were accentuations that few would notice in the conglomerate company around them, but Brandon's was an experienced taste.

For their evening he had chosen the brightest of the fashionable rendezvous where names and distinction of some sort or other are held to be the only acceptable sesame. The women were beautiful and of the varied pattern that decorates the new age. Debutantes and matrons from the first families, nasal-voiced and red-throated women of the nouveau riche from the last families, and the ever inescapable bevy of movie celebrities from none. Joanna had tasted of the gaudy cabarets—they had been the lamp posts along her paths of gaiety. But here—here were women gownned by the master dressmakers of the day, artists of the world of the elect. And the men matched the women. She

SICK ABED EIGHT MONTHS

After Taking Lydia E. Pinkham's
Vegetable Compound Could Do
All Her Work and Gained
in Weight

Melfort, Saskatchewan. — "I had inward troubles, headaches and severe pains in my back and sides. I was so sick generally that I could not sit up and I was in bed most of the time for eight months. An aunt came to visit and help me as I was unable to attend to my baby and could not do my work. She told me to try Lydia E. Pinkham's Vegetable Compound, and after taking two bottles I could get up and dress myself. I also took Lydia E. Pinkham's Blood Medicine. When I first took the medicine I only weighed seventy-eight pounds. Now I weigh twice as much. If I get out of sorts or weary and can't sleep I always take another bottle of the Vegetable Compound. I find it wonderfully good for female troubles, and have recommended it to my neighbors. I will be only too glad to answer any letters I receive asking about it." — Mrs. WILLIAM RITCHIE, Box 486, Melfort, Saskatchewan.

Secretary-Treasurer.

Provincial Notes.

TRIUMPH FOR TELEPHONES

For the first time in Canadian election history, all the results of the recent provincial election in Alberta were handled by telephone, instead of by telegraph, and this result was a triumph for the Alberta Government Telephone Department. In less than three hours after the close of the polls the result of the first choice count in all of the 2,450 polls in the province, including the north country, were known, with the exception of a few from the most isolated polls, the first choices had been tabulated in every constituency.

Nearly 300 people in as many phone exchanges in the province were engaged in the work of collecting the returns. One hundred and eighty-five thousand miles of rural and long distance wire carried the news, covering the province with a vast network of telephone communication. Special telephone compiling operators were placed in the daily newspaper offices in Edmonton, Calgary and Lethbridge, five at Edmonton handling 26 ridings, four at Calgary handling 16 ridings, and two at Lethbridge handling six ridings. The returns were handed to the newspapers as soon as received, and conveyed over Canadian Press wires. In five constituencies the entire work of compiling all returns was handled by the telephone department.

JUNE HOMESTEADS

A total of 170 homesteads were taken up in northern Alberta in June, according to registrations at the Dominion Land Office in Edmonton.

WANT MORE IRRIGATION

Petitions for extension of irrigation in Southern Alberta are being made up by farmers near Burdette, Grassy Lake, and Purple Springs.

MANY NEW SETTLERS ARRIVING

Nearly 500 settlers registered at the Immigration Hall at Edmonton during June, which is about three times as many as for the same month last year. Since January approximately 3,700 settlers have arrived at the Immigration Hall in Edmonton.

Breaking a record for July weather and culminating a week of perfect weather for the stampede week, the local temperatures on Sunday reached the height of 90 degrees above zero. With hardly any wind for the day, the heat was particularly noticeable.

The weather for the week has been equally hot, the coolest day being Wednesday when the temperature was only 78 degrees. Saturday's temperature was 88, the next hottest being last Monday at 87.

Other parts of Canada have apparently experienced the same high temperatures during the past week. From Montreal to Vancouver, towns and cities have been struck by a heat wave, some places having almost tropical weather.

POSTAL RATES NOW IN FORCE.

The tie-up of events in Ottawa has not affected the new postal rates brought into force on July 1, according to local post office officials. It was understood at first that the prorogation of the house of commons had stranded much of the legislation being dealt with but the new postal rates did not come under this heading.

According to a statement made by the postmaster at Calgary, the rate for letters to destinations within the city is 2 cents for the first ounce, and 1 cent for each additional ounce. The rate for letters to points in Canada and the United States is 2 cents per ounce and the rate to points in the Old Country is 3 cents per ounce.
